

Team Name: sdmay21-

Team Members: Jon Greazel, Harrison Majerus, Hayden Sellars, Joseph Strobel, Nicholas Battani, Stefan Peng

Report Period: Sept 14-Sept 27

Summary of Progress in this Period

We presented a requirements slideshow to our client/professor and worked to narrow them down and fully understand them. We then worked with the full list of requirements to create design document V1. Our client also gave us some software (Caldera) to become familiar with for moving forward.

Pending Issues

We will need to work together to create design plans for the application for design document V2.

Plans for Upcoming Reporting Period

We plan to work on Design Document V2, which will include designing the architecture and UI of the application. V2 will also include testing, so we will need to decide on a testing library.
