

Team Name: sdmay21-

Team Members: Jon Greazel, Harrison Majerus, Hayden Sellars, Joseph Strobel, Nicholas Battani, Stefan Peng

Report Period: Sept 28-Oct 11

Summary of Progress in this Period

This period began with us submitting our Design Doc V1. We then began independent research on attack trees, attack-defense trees, and game theory that will be used to create back end analysis engines. We've also created a few diagrams to illustrate the high level design of the application.

Pending Issues

More research on Game Theory will prove helpful.

Plans for Upcoming Reporting Period

We have more diagrams about the UI and about the overall architecture to complete. We also must start drafting chapters 3 and 4 for the design document.
